Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit 1711

Applicants' election of Group I in Paper No. 6 as well as the species of butadiene containing block copolymers and other hydrogenated vinyl aromatic/cojugated diene block copolymers is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1, 2, 5-10, 12-14
Claims 1-14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hoeg et al. (USP 3,598,886).

Hoeg et al. disclose in Examples 59-71 fully hydrogenated styrene butadiene styrene block copolymers having greater than 40% butadiene and for which molecular weights within applicants' range be calculated based on the number of moles of butyl lithium and the amount of monomer disclosed in applicants' and patentees' molecular weights therefore reasonably appear to be inherently the same since sequential polymerization utilizing butyl lithium is not 100% efficient in that initiation of the new polymer blocks sometimes does not occur. There would reasonably also appear to be some homopolystyrene or styrene butadiene diblock copolymer present in the Examples. Films (as in monolayers) are disclosed at the paragraph bridging columns 2 and 3 and furthermore the composition of the Examples is formed into a specimen one inch thick and one quarter inch wide which would be considered a film by those skilled in the art or monolayer. The materials are said to be 97% hydrogenated at column 3 lines 54-60.

When the reference discloses all the limitations of a claim except a property or function, and the Examiner cannot determine whether or not the reference inherently possesses properties which anticipate or render obvious the claimed invention, basis
